

STATOILHYDRO ASA / VOLVE FIELD OPERATIONS

DAILY DRILLING REPORT (DDR) — WELL 15/9-F-15 S

Wellbore Name: 15/9-F-15 S	NPD Wellbore ID: 6023	Field / Block: Volve / PL 046
Report Date: 2009-02-18	Midnight Depth (MD): 3220.0 m	Midnight Depth (TVD): 3118.5 m (3075.0m TVDSS)
Current Formation: Skagerrak FM	Hole Size: 8.5 in	Mud Weight: 1.28 SG

2. INCIDENT & HOLE CLEANING NARRATIVE (PAGE 2 SUPPORTING PASSAGE)

High torque spikes and string stall encountered entering Skagerrak abrasive interval at 3220m MD (3075m TVDSS). Shaker screens showed poor cutting returns and large cavings. Annular velocity insufficient to carry heavy abrasive sands. Pumped high-viscosity tandem sweeps (30 bbl weighted pill followed by 30 bbl low-vis pill). Reamed interval twice before resuming drilling. 14.5 hours NPT logged.
